## Intrex 5 offers mobile applications for smartphones - United Planet introduces latest version of enterprise portal software Intrex and a new edition for small enterprises

London, 24 March 2010. United Planet ([www.unitedplanet.com](http://www.unitedplanet.com)), one of the leading developers of enterprise portal software in Europe, is pleased to announce that the latest version of Intrex is now available. **Intrex 5** will enable companies to create web applications for mobile devices such as the iPhone, BlackBerry and others, delivering customer data and employee information to mobile devices quickly and easily. According to United Planet, an entire enterprise portal can be made mobile in only a few days, using a special page generator that is incorporated into Intrex.

A new Designer allows companies to create internet pages with high performance as well as largely barrier-free accessible web applications. Intrex 5 also features a revamped Process Designer that incorporates new features and wizards to make the management of business processes even more flexible and easy.

At the same time as announcing Intrex 5, United Planet is re-branding Intrex Xtreme for medium-sized businesses as **Intrex Professional** ([www.unitedplanet.com/en/pro](http://www.unitedplanet.com/en/pro)) and launching a dedicated version of Intrex for smaller companies called **Intrex Compact** ([www.unitedplanet.com/en/compact](http://www.unitedplanet.com/en/compact)). While Intrex Professional includes a complete enterprise portal for mid-sized businesses, Intrex Compact offers a portal for companies with up to 25 PC workstations that is ready for immediate use. Both portals can be accessed using either a web browser or a smartphone.

The Intrex Compact Portal contains more than 50 ready-to-use web applications and templates that are specifically tailored to meet the requirements of smaller businesses and that help organisations to manage internal processes more efficiently. Specialised sales applications such as a customer relationship management (CRM), contract management, or an sales activity and marketing planner are included alongside Web 2.0 applications (such as a company wiki), allowing businesses to consolidate company knowledge and information with ease. Just as with Intrex Professional, Intrex Compact also allows companies to integrate data from

existing systems into the portal and make this data available for mobile use with just a few clicks of the mouse.

Unlike other solutions in this market sector, Intrexx Compact can be customised to meet individual business requirements. No previous programming experience is required; new applications can be created very quickly and simply, added to the portal, and transferred onto a smartphone as required.

Further information about Intrexx and United Planet is available at [www.unitedplanet.com](http://www.unitedplanet.com).

### About United Planet

United Planet is one of the leading developers of Enterprise Portal software in Europe. Its Java based, standard software Intrexx enables companies to create Enterprise Portals, Intranets and Web Applications cost effectively, without the need for programming by using 'drag and drop' technology and pre-created solutions for quality management, document management and process management to optimise internal workflow. Intrexx runs on Windows as well as on Linux and Sun Solaris, and incorporates several Business Adapters to ensure that third-party data from Lotus Notes and other ERP solutions can be easily integrated in the Intrexx Portal. A special Business Adapter for MS Office also makes it possible to integrate and edit Microsoft Office Documents without the need for Microsoft Office SharePoint Server (MOSS). United Planet is headquartered in Freiburg, Germany and also has offices in Windsor. The company is supported by over 100 Business Partners worldwide.
