## **Intrex 5 Professional puts a whole enterprise portal into your pocket - Create your own business applications for smartphones and the iPad**

**London, 27 April 2010.** United Planet ([www.unitedplanet.com](http://www.unitedplanet.com)), one of the leading developers of enterprise portal software in Europe, has extended its successful Intrex series. The new *Intrex 5 Professional* enables users to create their own mobile enterprise applications for smartphones and the iPad with just a few clicks of the mouse and without any programming knowledge. With this feature United Planet is responding to its customers' growing need to be able to use portal applications when they are on the move.

Creating an application that can be accessed via the iPhone, BlackBerry, iPad and other mobile devices is very easy: After having built an application with Intrex via 'drag and drop', simply select the desired mobile device. Intrex automatically takes care of the technical implementation and special requirements of the selected device (such as bandwidth or sliding effects). Even data from existing software systems (ERP, CRM etc.) can be transferred to the mobile phone quickly and easily. An entire enterprise portal can be made mobile in just a few days. To facilitate a speedy start, Intrex 5 Professional includes 30 ready-to-use applications as standard.

Axel Wessendorf, managing director at United Planet, said: "In this way, both managers and employees can access all important company data and documents anytime, anywhere, even when they are not in the office. Field staff can access the most current customer data on their way to a meeting, managers can approve an employee's application for leave or check an invoice from home. Intrex 5 Professional really does open up the power of the portal to mobile users."

In addition, Intrex 5 Professional allows users to create high-performance internet pages at the same speed and ease as intranet pages. By reducing load times for these pages by up to 90 per cent, thanks to comprehensive caching mechanisms, Intrex performs significantly better than many popular web pages. Furthermore, it is also possible to create highly accessible applications to increase usability for all. United Planet has been able to achieve this by developing an entirely new layout designer based on CSS (Cascading Style Sheets) which allows the user to position each element, right down to the pixel. This offers unequalled flexibility when pro-

Professional users are designing portals, ensuring that portals fully conform to an organisation's corporate design - including the logo, in-house colour scheme and font style.

Despite the addition of these key innovations, United Planet has been able to keep license cost at the same level. A user license for Intrexx Professional still costs EUR 105 per user and a runtime license, which allows unlimited user access to an application, costs EUR 1,940.

Further information about Intrexx 5 Professional is available at [www.unitedplanet.com/en/pro](http://www.unitedplanet.com/en/pro).

### About United Planet

United Planet is one of the leading developers of Enterprise Portal software in Europe. Its Java based, standard software Intrexx enables companies to create Enterprise Portals, Intranets and Web Applications cost effectively, without the need for programming by using 'drag and drop' technology and pre-created solutions for quality management, document management and process management to optimise internal workflow. Intrexx runs on Windows as well as on Linux and Sun Solaris, and incorporates several Business Adapters to ensure that third-party data from Lotus Notes and other ERP solutions can be easily integrated in the Intrexx Portal. A special Business Adapter for MS Office also makes it possible to integrate and edit Microsoft Office Documents without the need for Microsoft Office SharePoint Server (MOSS). United Planet is headquartered in Freiburg, Germany and also has offices in Windsor. The company is supported by over 100 Business Partners worldwide.
