

United Planet offers management consultancy for free in comprehensive webinar programme

London, 27 May 2010. United Planet (www.unitedplanet.com), one of the leading developers of enterprise portal software in Europe, is offering its considerable experience and expertise in enterprise portals for free in a comprehensive webinar programme.

Delivered by its team of consultants, the programme enables portal developers and businesses alike to find out how to maximise the potential of enterprise portals via a series of short, online conferences that encourage knowledge sharing and question and answer sessions in small groups.

The webinar program covers a variety of topics:

- How to use the portal software, Intrexx, to build and run individual web applications or entire enterprise portals with a simple 'point and click'
- How to use an enterprise portal to optimise operational procedures and reduce costs through automation of business processes
- How to use service oriented architecture (SOA) and how to use and provide web services throughout an organization in order to increase business agility
- How to integrate data from other systems (such as SAP or Lotus Notes) into an enterprise portal

One of the key benefits of using the Intrexx portal software is that it uses a graphical user interface, which means that webinar participants do not need any programming knowledge to benefit from the online conference or during the development phase of their own enterprise portal.

An overview of all webinars offered by United Planet can be found at: www.unitedplanet.com/en/webinars.

About United Planet

United Planet is one of the leading developers of Enterprise Portal software in Europe. Its Java based, standard software Intrexx enables companies to create Enterprise Portals, Intranets and Web Applications cost effectively, without the need for programming by using 'drag and drop' technology and pre-created solutions for quality management, document management and process management to optimise internal workflow. Intrexx runs on Windows as well as on Linux and Sun Solaris, and incorporates several Business Adapters to ensure that third-party data from Lotus Notes and other ERP solutions can be easily integrated in the Intrexx Portal. A special Business Adapter for MS Office also makes it possible to integrate and edit Microsoft Office Documents without the need for Microsoft Office SharePoint Server (MOSS). United Planet is headquartered in Freiburg, Germany and also has offices in Windsor. The company is supported by over 100 Business Partners worldwide.
