
Intrexx integrates data from Microsoft Exchange 2010 and ABACUS ERP into web-apps and portals

London, 20 September 2011. United Planet (www.unitedplanet.com), one of the leading developers of enterprise portal software in Europe, is pleased to announce that the ability to incorporate data from ABACUS Business Software and Microsoft Exchange 2010 into web-based applications and enterprise portals has been made possible with the launch of two new Intrexx Business Integration Adapters.

The **Intrexx Business Integration Adapter for ABACUS Business Software** is available as part of the new version of Intrexx 5.2. It enables the quick and easy integration of data from ABACUS ERP solutions into web-based applications and procedures, providing real-time read and write access to all data fields.

Also available is the **Intrexx Business Integration Adapter for Microsoft Exchange 2010** (www.intrexx.com/en/business-adapters/microsoft-exchange) which enables all the data and services from Microsoft Exchange 2010 to be incorporated into an organisation's intranet or portal.

The new Intrexx Business Integration Adapters (www.intrexx.com/en/business-adapters) join the existing range of Adapters for SAP Business Suite, SAP Business One, IBM Lotus Notes and Microsoft Office. The adapters not only provide companies with the ability to web-enable data from existing systems, they also provide mobile access to this data.

This means that field staff are now able to review data while they are out of the office from the company ERP system, for example, to immediately check whether an item is available, and in what quantities. The ability to obtain an electronic authorisation from a line manager so that a customer can be offered a special discount rate during a meeting is another exam-

ple of the flexibility Intrexx provides - a quality which is becoming more and more business relevant.

Companies can profit immensely from real-time data access via mobile devices. The German system supplier Nölle & Nordhorn, for example, provides their field staff with customer data from SAP on iPhones. The solution was implemented in only four weeks and has already resulted in additional sales of more than 250.000 Euro. "What we like best is that Intrexx enables us to quickly mobilise data and processes ourselves - and that we can mobilise the exact data that we need", says Panagiotis Varlangas, head of IT organisation at Nölle & Nordhorn GmbH.

About United Planet

United Planet is one of the leading developers of enterprise portal software in Europe. More than 3,500 mid-size companies, public administrations and organisations worldwide rely on its portal software Intrexx. The Java-based, standard software Intrexx enables companies to create enterprise portals, intranets and web applications cost effectively, without the need for programming by using 'drag and drop' technology. Intrexx is platform independent and runs on Windows as well as on Mac OS X, Linux and Sun Solaris. Data from existing systems as IBM Lotus Notes, Microsoft Exchange or ERP solutions such as SAP can be easily integrated in the Intrexx Portal. A special Business Adapter also makes it possible to integrate and edit Microsoft Office Documents (Word, Excel etc.) without the need for Microsoft SharePoint. United Planet is headquartered in Freiburg, Germany, and also has offices in London, UK. The company is supported by over 100 Business Partners worldwide.
