
United Planet makes time recording easy with new web-based intranet application

London, 27 August 2009. United Planet (www.unitedplanet.com), one of the leading developers of Enterprise Portal software for mid-sized companies in Europe, has unveiled a new web-based application, Intrexx Time Recording, to enable employees to track and record 'hours worked' quickly and easily on the company intranet, from any location.

Employees can create customer and project records and allocate hours worked directly onto the intranet, either using a stopwatch or by entering hours worked manually. Time can be recorded immediately or at a later date, from the office, while with a customer or from home.

Employees and managers are able to view clearly structured reports across all projects and customers at any time in order to track activity, re-allocate time and resources as needed and to simplify the invoicing and quotation process going forward. Analysing working hours in detail and on the basis of time split across customers, projects or time periods also provides an opportunity to streamline and optimise the company's working processes.

An intuitive menu structure and graphical development environment ensures that the application is completely self-explanatory, can be used without any prior programming knowledge and eliminates the need for time-consuming training sessions. Additional features can be implemented easily and at any time using the Intrexx Portal Manager.

Intrexx Time Recording is based on the established sector-independent portal software, Intrexx, which enables companies to create Web Applications, Intranets and Enterprise Portals with a wide range of functions quickly and cost-effectively. In addition to Intrexx Time Recording, United Planet also offers out-of-the-box solutions for document management, project management, CMS and CRM (www.unitedplanet.com/en/studios).

For further information about Intrexx Time Recording, visit www.unitedplanet.com/time-recording.

About United Planet

United Planet is one of the leading developers of Enterprise Portals in Europe. Its Java based, standard software, Intrexx Xtreme, enables companies to create out-of-the-box Enterprise Portals, Intranets and Web Applications cost effectively, without the need for programming by using 'drag and drop' technology and pre-created solutions for quality management, document management and process management to optimise internal workflow. Intrexx Xtreme runs on Windows as well as on Linux and Sun Solaris, and incorporates several Business Adapters to ensure that third-party data from Lotus Notes and other ERP solutions can be easily integrated in the Intrexx Portal. A special Business Adapter for MS Office also makes it possible to integrate and edit Microsoft Office Documents without the need for Microsoft Office SharePoint Server (MOSS). United Planet is headquartered in Freiburg and also has offices in Windsor. The company is supported by over 100 Business Partners worldwide.
