Intrex Intranet Software Certified for IBM DB2

Companies using IBM DB2 database to benefit from enhanced efficiency provided by modern enterprise portal

London, 23 November 2011. United Planet (www.unitedplanet.com), one of the leading developers of enterprise portal software in Europe, is pleased to announce that IBM has awarded the Intrex intranet and portal software with “Ready for IBM DB2 database software” certification.

The award of the certificate follows hot on the heels of the recent award of Microsoft Windows Server 2008 certification for Intrex and confirms the technical functionality and performance capabilities of Intrex to work reliably and effectively with the DB2 database. It means that companies that use the IBM database will be able to benefit from increases in efficiency offered by modern enterprise portals and the ability to create web applications quickly and easily.

Intrex already has a proven track record of working effectively and efficiently with the Microsoft SQL Server and the Oracle database, as well as Open Source databases such as Apache Derby and PostgreSQL. One of the key benefits of working with Intrex is the ability to switch supporting databases during live operation. This provides companies with a high degree of flexibility at all times and enables them to react to changing market situations immediately, as and when necessary.

More than 3,500 companies worldwide already use Intrex to help them automate and accelerate business processes, promote cooperation and collaboration between staff, clients and suppliers, and to optimise the distribution of internal information, even if employees are out of the office and need to access data via a mobile device.

The ability to freely select the database and the operating system for Intrex is regarded as a major benefit by organisations. Intrex not only

About United Planet

United Planet is one of the leading developers of enterprise portal software in Europe. More than 3,500 mid-size companies, public administrations and organisations worldwide rely on its portal software Intrexx. The Java-based, standard software Intrexx enables companies to create enterprise portals, intranets and web applications cost effectively, without the need for programming by using 'drag and drop' technology. Intrexx is platform independent and runs on Windows as well as on Mac OS X, Linux and Sun Solaris. Data from existing systems as IBM Lotus Notes, Microsoft Exchange or ERP solutions such as SAP can be easily integrated in the Intrexx Portal. A special Business Adapter also makes it possible to integrate and edit Microsoft Office Documents (Word, Excel etc.) without the need for Microsoft SharePoint. United Planet is headquartered in Freiburg, Germany, and also has offices in London, UK. The company is supported by over 100 Business Partners worldwide.
