
Mobile Enterprise Portals Turn Smartphones and Tablet PCs into Fully Equipped Mobile Workstations - Creating the Workplace of the Future

London, 26 October 2010. United Planet (www.unitedplanet.com), one of the leading developers of Enterprise Portal software in Europe, has highlighted the increasing need for companies to create flexible workplaces. As the growing number of “Knowledge Workers” often spend more time working outside of the office than at their workstation, companies are increasingly facing the challenge of providing these employees with guaranteed access to business critical information, anytime and anywhere.

Mobile devices like the iPhone, BlackBerry, iPad, and tablet PCs are now powerful enough to enable Knowledge Workers to work efficiently outside the office. However it is only companies that create their own web based applications for smartphones and tablet PCs that are able to provide their employees with the most flexible and efficient environment in which to work.

United Planet’s standard portal software Intrexx enables companies to transform all the information and applications residing on an Enterprise Portal into mobile web applications with just a few clicks of the mouse. Without programming, companies can convert Intrexx portal applications and forms for access by modern smartphones or tablet PCs. Even data from existing systems - such as SAP or Lotus Notes - can quickly be “made mobile” in this way.

“Intrexx helps modern Knowledge Workers work whenever they want”, explains Axel Wessendorf, managing director at United Planet. “It provides employees with access to vital company, product and project data from wherever they are working. They are not only able to view this data, but also to change or update it. This is particularly important for field-

based employees or managers who need to be able to monitor business processes at all times.”

A mobile Intrexx Enterprise Portal provides employees with read and write access to the most important company information from anywhere, at any time. Whether they are dealing with price lists, material data or product information, employees can edit all data on the spot. All modifications are transferred to the portal in real-time.

The portal also helps employees to be integrated and involved in all the company’s internal processes - even if they are out of the office: For example, via their smartphone employees can file their holiday applications and managers can release documents or approve expense claims on the go. The result: iPads and smartphones become fully equipped mobile workplaces.

Because the portal runs in the mobile device’s browser, there is no software to install. The user simply logs in via the Web for immediate access to all the applications on the portal. To find out what a mobile Enterprise Portal could look like, visit the United Planet demo portal at: www.intrexx.com/motorsportprolimited.

An extensive portfolio of efficiency-saving business applications that can be accessed via smartphones or tablet PCs is available for immediate download from the Intrexx Application Store (www.intrexx.com/en/appstore).

About United Planet

United Planet is one of the leading developers of Enterprise Portal software in Europe. Its Java based, standard software Intrexx enables companies to create Enterprise Portals, Intranets and Web Applications cost effectively, without the need for programming by using 'drag and drop' technology and pre-created solutions for quality management, document management and process management to optimise internal workflow. Intrexx runs on Windows as well as on Linux and Sun Solaris, and incorporates several Business Adapters to ensure that third-party data from Lotus Notes and other ERP solutions can be easily integrated in the Intrexx Portal. A special Business Adapter for MS Office also makes it possible to integrate and edit Microsoft Office Documents without the need for Microsoft Office SharePoint Server (MOSS). United Planet is headquartered in Freiburg, Germany and also has offices in Windsor. The company is supported by over 100 Business Partners worldwide.
